DETAILED ACTION

Applicants' response, which included cancellation of claims 7-8 and amendment to claims 1, 2 and 11, filed on 6/25/2007, is made of record. Claims 1-6 and 8-17 are pending. Of which, claims 12-17 were withdrawn from consideration by the applicants in response dated 11/6/2006. Claims 1-6 and 9-11 are now under consideration.

In view of applicants' amendment to claim 1, the following rejections are applied.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-6, 9 and 10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The proviso inserted in claim 1 is new matter as there is no support for the exclusion of a species which applicants are not in possession of. If the application as filed does not disclose that species, then excluding the species that is not identified in the specification would raise issue of new matter. Applicant could have amended the definitions of variables to overcome the art rejection (based on *In re Johnson* 194 USPQ 187), however, applicant can not exclude any thing that is not present in the disclosure as filed. Applicant is silent about any support for the excluded compound. This is clearly new matter.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Tuntulani et al., Bulletin of the Korean Chemical Society, 21(12), 1245-1248, 2000. CAPLUS Abstract provided.

See compound shown in the CAPLUS Abstract. When A¹ is second choice, the compound taught by Tuntulani et al., anticipates instant compound generically claimed in claim 1.

This rejection is same as made in the previous office action. As noted above, the proviso of the currently amended claim 1, as noted above, is new matter. Hence, this rejection is maintained.

Allowable Subject Matter

Claim 11 is allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
